

MULTI-USE SPRAY A300 400ML

Produced with a formulation that guarantees the release of metals and the removal of rust. Anti-corrosive and antioxidant properties with high lubricating power, the product is water repellent and is a protection against humidity.

The "all in one" solution for each type of intervention.

- Multifunction product: releases, lubricates, cleans, removes squeaking, water repellent and anti-humidity
- Appearance: straw-colored liquid
- Instructions for use of liquid and spray product: distribute the product in the way that is more appropriate, immersion, brush or spray, let the product act for a few minutes favoring its penetration into the pores of the material.

Code	ml
WE-A300-MP	400 ml

MOS2LUBE A320 MOLYBDENUM DISULFIDE LUBRICANT

Lubricant with releasing properties, the presence of molybdenum disulfide (MOS2) facilitates and enhances the releasing and slipping power. Prevents the formation of new oxidations leaving a protective and lubricating film.

- Releasing agent with high protective power, protects against oxidation
- Appearance: black liquid.

Code	ml
WE-A320-ML	400 ml

ANTI-SKID FOR GRIP A350 BELTS

Product that allows and facilitates the perfect movement of belts in leather, rubber, fabric and nylon. It prolongs the life of the belts preventing cuts and cracks.

- Appearance: ocher liquid
- How to use the product: before applying the product, carefully clean the seat and the belt itself, the best results are obtained with light but frequent applications. Not recommended for use in environments with significant presence of volatile solid materials (eg wadding or wool mills).

Code	ml
WE-A350-BG	400 ml

TORCHWELD A380 ANTI-SLAG FOR WELDING

Anti-adhesive anti-slag avoids the adhesion of slag and welding drops on any support. Suitable for autogenous welding, electric welding and inert gas welding.

The product is additive with molybdenum disulfide and does not contain silicones and graphite.

- Protects the torch nozzle in continuous wire welders, avoiding seizing between the contact surfaces subjected to high temperatures and pressures
- Appearance: black liquid.

Code	ml
WE-A380-TW	400 ml

ANTISPATTER A385 WELDING SPRAY 400ML

Protective anti-adhesive prevents the adhesion of slag and solder drops on any support. Suitable for autogenous, electric and inert gas welding, protects the piece to be welded from welding spatter without altering the quality of the weld bead, does not contain silicones.

- Complete surface protection during welding, eliminates the need to scrape the welded parts; the subsequent treatments of painting, galvanization etc., can be performed without special cleaning, excess dirt and debris can be removed with a detergent
- Appearance: colorless liquid.

Code	ml
WE-A385-ASS	400 ml

LEAK TEST A390 SPRAY 400 ML

Product that detects leaks of gas or compressed air in systems, pipes, pressure tanks and cylinders. The applied product reacts creating foaming bubbles in case of leaks.

- Appearance: colorless liquid.

Code	ml
WE-A390-LT	400 ml

DRY AIR P390 COMPRESSED AIR 400 ML

Powerful air blast suitable for removing all types of dirt from areas that are otherwise difficult to access. Necessary for cleaning computer keyboards, watches, precision machinery, delicate mechanisms, electronics, cameras. The product is flammable.

Code	ml
WE-DA-P390-CA	400 ml

UNIVERSAL CUTTING OIL 400ML F500

Product with cooling and lubricating action, suitable for all types of metal. Useful for drilling, cutting, threading, tube processing and mold operations. Non-drip.

- Lubricant oil for cutting, drilling, tapping, facilitates metal processing
- Appearance: straw-colored liquid.

Code	ml
WE-F500-COU	400 ml

CUTTING OIL FOR STAINLESS STEEL 400ML F510

Product with cooling and lubricating action, suitable for all types of stainless steel. Useful for drilling, cutting, threading, tube processing and mold operations. Non-drip.

- Lubricant oil for cutting, drilling, tapping, facilitates the processing of stainless steels
- Appearance: straw-colored liquid.

Code	ml
WE-F510-COSS	400 ml

ALU CUT F520 ALUMINUM CUTTING OIL

Product with cooling and lubricating action, suitable for all types of aluminum and yellow alloys. Useful for drilling, cutting, threading, tube processing and mold operations. Non-drip.

- Lubricant oil for cutting, drilling, tapping, facilitates the processing of all types of aluminum and its alloys and yellow alloys
- Appearance: straw-colored liquid.

Code	ml
WE-F520-COA	400 ml

UNIVERSAL CUTTING FLUID ER-F680 FOR HIGH PERFORMANCE

Product made with materials of vegetable origin additivated with ER (additive for high pressures). Does not contain: mineral oils, toxic solvents, chlorofluorocarbons (CFCs); non-flammable. Green, environmentally friendly product that provides exceptional performance in tapping, drilling, milling and cutting of common steel, stainless steel, titanium, aluminum and its alloys and all metals difficult to machine (Cutting & Tapping).

- Does not drip, extreme adhesion, cools, lubricates and protects the tool contact interface, increasing the tool lifecycle by up to 10 times.

Code	ml
WE-F680-COHP	400 ml

GREASE SPRAY G300 400ML

Multi-purpose grease with excellent adhesive properties. Ideal for DIY and maintenance of any mechanical part. The strong penetration action guarantees a long-lasting lubrication of the treated parts.

- For general maintenance
- Appearance: brown pasty.

Code	ml
WE-G300-GS	400 ml

SILICONE SPRAY 400ML

Product with cooling and lubricating action, suitable for all types of aluminum and yellow alloys. Useful for drilling, cutting, threading, tube processing and mold operations. Non-drip.

- Lubricant oil for cutting, drilling, tapping, facilitates the processing of all types of aluminum and its alloys and yellow alloys
- Appearance: straw-colored liquid.

Code	ml
WE-L630-SS	400 ml

CHAIN LUBRICANT L 650 SPRY 400 ML

Spray lubricant specifically formulated for correct and appropriate lubrication of metal chains for industrial machinery. Excellent adhesiveness and resistance to strong pressures. The high viscosity of the product guarantees the sliding of the chains and the sliding of the bearings subjected to high rotations. Does not damage rubber or plastic parts.

- For chains, industrial machinery, excellent adhesion, by penetrating the mesh and lubricating the pins, it reduces wear on the chain, crown, pinion and moving mechanical parts, always ensuring maximum performance
- Appearance: brown liquid.

Code	ml
WE-L650-CL	400 ml

PTFE DRYLUBE L680 SPRAY 400 ML

Dry PTFE lubricant, particularly effective in applications that require a clean lubricant spray that does not stain. Resists to water, oils and abrasion, does not retain dirt and dust.

- Dry lubricant, non-greasy and does not stain
- Appearance: opalescent white.

Code	ml
WE-L680-PTFE	400 ml

CONTACT CLEANER P250 SPRAY 400 ML

Product developed and tested for the deoxidation of electrical and electronic components / materials unpowered. Quick penetration, evaporates in seconds without leaving residues. Before using the product in the presence of painted rubber parts or plastic material, it is advisable to carry out a test on a small portion of the equipment to be treated.

- Appearance: colorless liquid.

Code	ml
WE-P250-CC	400 ml

ZINC-COATING R730 SPRAY 400ML

Cold galvanizing agent light colored, ideal for retouching galvanized parts on gates, frames and as protection on welded or machined parts. Resistant to grease and oils, dries quickly and can be used as a primer for any type of paint.

- Appearance: gray / liquid silver.

Code	ml
WE-R730-ZC	400 ml
